Min and Max homework

10-02-2024

```
# Write a Python program that prints the largest and smallest values in a list
# Print the two values on the same line, separated by a space
# The largest value should appear first and the smallest value appear second
# You may assume that the list only contains numeric values
# If the list is empty, print None

# Expected output
# [3,4,5,6] 6 3
# [-1,-2,-3,-4] -1 -4
# [0,0,0,0] 0 0
# []
```

```
WIN10@DESKTOP-OL1MV38 MINGW64 ~/Documents/CloudFormation/Python
  $ python min_max.py
  6 3
  -1 -4
  0 0
  []
```
